Monitoring Clinical Symptom Change

- *Youth Outcome Questionnaire 30.2 Self-Report (YOQ ® 30.2 SR), a 30-item youth self-report that assesses youth overall clinical distress, somatic, social isolation, conduct problems, aggression, hyperactivity/distractibility, and depression/anxiety. The measure is sensitive to short-term change, well validated and reliable across multiple diverse clinical populations.
- Youth’s clinical symptom change is assessed based on the first and most recent YOQ scores and categorized the change according to the following distress groups: non-distressed/healthy, reliably improved, stable distress, and reliably worsened.

Youth Guidance Center (YGC)

YGC is an unlocked facility for both female and male youth ages 13 through 20 years that offers assessment and treatment services to youth during their period of incarceration, with a focus on substance use rehabilitation.

In FY19/20 and FY20/21 (July-Dec), there were 2 clients that had both intake and follow-up assessments while enrolled in the YGC program. Both of those clients were non-distressed/healthy at follow-up. During FY18/19, there were 35 clients in YGC that had intake a follow-up YOQs. Of those clients, 73% were either **non-distressed/healthy** or **reliably improved** at follow-up.

Youth Reporting Center (YRC)

The YRC is an OC Probation-OC Health Care Agency joint program for youth ages 12 through 18 years as an alternative to incarceration. Behavioral health services include individual, group, family therapy, case management, crisis services, and independent living skill building for mental health and substance use needs. YRC consists of two regions – North and Central – but currently both are housed centrally.

In FY19/20 and FY20/21 (July-Dec), YRC Central served 99 clients that had both intake and follow-up YOQs, and 115 of YRC North’s clients had both intake and follow-up measures. Of those, 76% (Central) and 82% (North) were **non-distressed/healthy** or **reliably improved** at follow-up. During FY18/19, the majority of clients at YRC Central and North were either **non-distressed/healthy** or **reliably improved** at follow-up.

YRC Central Behavioral Health Outcomes Youth Outcome Questionnaire (FY18/19; n=80)

YRC North Behavioral Health Outcomes Youth Outcome Questionnaire (FY18/19; n=135)

YRC Central Behavioral Health Outcomes Youth Outcome Questionnaire (FY19/20-FY20/21 July-Dec; n=99)

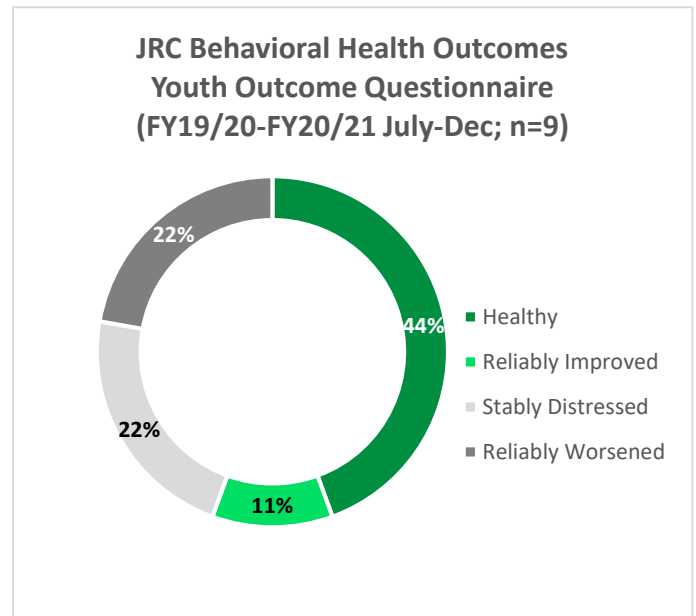

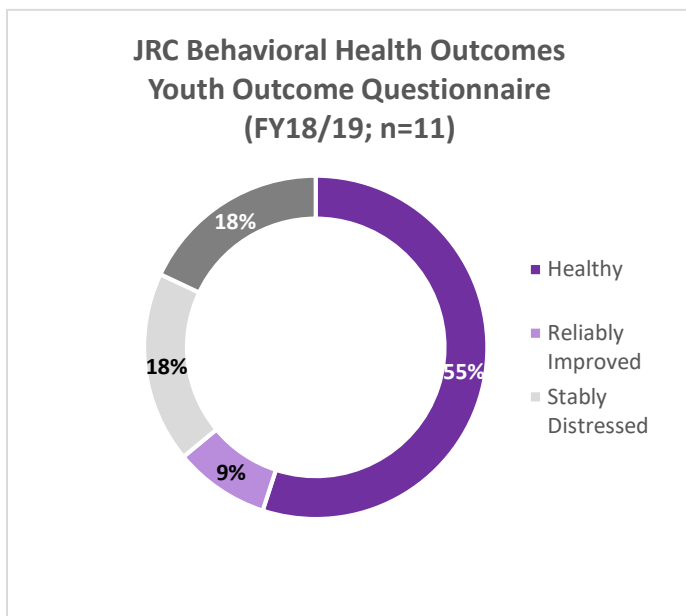

YRC North Behavioral Health Outcomes Youth Outcome Questionnaire (FY19/20-FY20/21 July-Dec; n=115)

Juvenile Recovery Court (JRC)

The JRC is a collaborative endeavor between HCA, Probation, the Collaborative Court Full Service Partnership, and the Juvenile Court for youth who committed substance use-related offenses. This court-based intervention program is a combination of substance use treatment, sanctions, and incentives designed to rehabilitate drug-involved youth, empower families to support them, and prevent reoffending.

In FY19/20 and FY20/21 (July-Dec), JRC served 9 clients that had both intake and follow-up YOQs. Of those, 54% were **non-distressed/healthy** or **reliably improved** at follow-up. During FY18/19, there were 11 clients served by JRC that had intake a follow-up YOQs. Of those clients, 64% were either **non-distressed/healthy** or **reliably improved** at follow-up.
